bination More Stampedes to the Upper Yukon Gold District Rain a Boon to California Mining Outputs for 1898. Hopggrox, Mich., Jan. G.-The Michigan Copper Company is in process of reorganization and where call was made for dut \$1,000 -The old Michigan (or Minnesota) mine paid dividends of \$1,820,000 and was abandoned by stockholders who refused to put up \$50,000 after receiving dividends of nearly \$2,000,000 ewenty-five years ego. The mine was pushed too hard, every dollar taken out was devoted to dividends, and the time came when new machinery was required, new ground was to be opened and there was no money in sight to do the work. There can be scarcely a doubt that the Michigan will resume its place among the great mines of Lake Superior. However much opinions mar differ on other properties the experienced mining men of the copper country are a unit on the great future ahead of the old Minnesota, as, was plainly evidenced by subscriptions to the stock from this distriet, Lake Superior capital subscribing for more than the full issue of stock, amounting to an even \$1,000,000, while Detroit people maked for between \$2,000,000 and \$3,000,000

The Rhode Island management has made an about face movement as rapid as unexpected. On Wednesday a score of miners were set at work turning the first sods for a shaft on the Calumet conglomerate reef. As soon as men and supplies can be got on the ground two additional shafts will be started, one each on the Pewable and Osceola lodes, Machinery has been ordered and work will be rushed. The developments both south and north of the Rhode Island are not of a kind calculated to give much confidence in the conglomerate proving rich, but the attempt is worth making. The main reliance will be on the Pewabic and

No. 2 shaft of the Franklin Junior, which is nearest the Rhode Island line, on the Pewabic lode, is far richer than No. I shuft, while re-cent developments in No. 2 shuft of the Centennial mine on the Osceola lode have opened.
he eyes of old miners. Within ten days a surprising amount of copper has been taken from No. 2 shaft of the Centennial. A single mass of nearly two tons was hoisted one week ago and numerous smaller masses of 300 to 800

All accounts from the Wirona agree in reporting wonderful richness in copper, and employees are buying shares according to their

Quincy shows a decline of 281,683 pounds mineral in 1808 as compared with the preceding year: When the new shaft goes into commission, this year or next, a material gain in production will be effected.

The Union Land and Copper Company, which so successfully launched the Old Colony, with Saint Marie's Canal Mineral Land Company, has plans under consideration for launching several other new mines. Where ever their lands are contiguous to those of the Canal Company, the two will join. It is a mar-ter of significance that the Canal Company, an ultra conservative corporation, insists on tak ing its pay for lands sold to new mines in stock rather than in cash.

The Mat'apan Company is to be launched in

the near future. It will company is to be faunched in the near future. It will comprise the old Frue and Dodge properties, lying next south of the Isle Royale consolidation, and several other tracts in the neighborhood, having a total area of 1,480 acres.

The Mendota, on Keweenaw Point, is to be

The Mendota on Keweenaw Point, is to be reopened. This properly carries a number of amygdaloid and conglomerate lodes bearing copper, but was opened originally as a copper ore mine. The ore is found in true flashing the copper-bearing formation stalmost right angles. The ore is a gravial property of the flashing that angles. The ore is a gravial property of the most of reduction by simple smelting. It is necessary to reduce most of the Montana ore by electrolysis on account of the considerable quantifies of arsenic and antimony, both highly refractory in furnace. There seems no longer a question that the Standard Oil people are in copper mining to a yensiderable extent, though they are not showing their hand. It is certain that the Calumet and Heela, Quincy and Canal Company people have been approached and have refused to go into the proposed consolidation. Whether the Bigelow-Lewischin interests, heretofore the dominant factor in American copper matters, have been swallowed by the Standard Jil combination or have themselves swallowed the other factors is a mystery.

LANE SUPERIOR INON.

LAKE SUPERIOR INON. DULUTH, Jan. 7.—Another new mime is to be opened on the Mesabarrange, this time by the Oliver Company, which has for several years owned a property at the west end of the range. This is the Sheridan, four miles west of Hibbing, and surveyors are now locating a line to it from the western terminus of the Duluth, Missape and Northern Road. The Oliver Company holds the mine under a lease requiring 46,000 tons to be mined or paid for annually.

The E. P. Allis Company of Milwaukee, which a few weeks also acquired two mining propes. The E. P. Allis Company of Milwankee, which a few weeks ago acquired two mining propositions on the Vermillion range, has secured a third of 160 acres, and has associated with itself 8.8. Curry, who for many years was manager of the Norrie mine, who; will thaveharse of developments at its properties. They will be opened and mined the present year. The new property is known to contain iron in abundance. Negotiations are pending for the lease to another eastern machinery manufacturer of mineral properties on the Vermillion, which will be opened and operated as soon as possible.

possible.

Experts are still examining the Franklin group for the Pittsburg Furnace Company, in which Jones & Laughlins, one of the heaviest Pittsburg manufacturers, are chief stock-

Pittsburg manufacturers, are chief stock-holders.

Of the 13,000 men employed on the five ranges in iron mines the average wages paid are now about \$1.00 for common labor, tramming and the like, and from \$2.25 to \$3 for miners, in some cases where men are worked on contract going better than this. The wages of 1892 were the highest ever paid miners, except at times of scarcity, when flour, for instance, was \$25 a barrel, and the scale of to-day is within a few cents of the pay of 1892. So far as purchasing power is concerned, the So far as purchasing power is concerned, the pay to-day is considerable letter than in 1882. There are in Minnesota on the Vermillion range 1.500 men and on the Mesaba 2.300; in Michigan, on the Marquette nearly 4.000, on the Gogebic 3.000 and on the Menominee 2.500.

The Thomas Furiace Company of Niles, O., has just closed the purchase of the Etna mine on the Mesabarange for about \$100,090. The mine has never been operated to any extent but has been explored to show some 5,000,090 tons of soft Bessemer ore that can be mined with the steam shovel, and is a part of the Mountain Iron deposit. The Thomas Company observes furneces and steel mills in Ohio, and will mine this ore for its own use. It had a lease on this mine for two years and an option to buy since November.

then to buy since November.

CALIFORNIA

Los Angeles, Dec. 31.—With even the small amount of rain that has fallen in northern California missing matters there alrendy show a decided increase in activity. In Calaveras county preparations have been made to conduct work at the Lightner mine on a much larger scale. The Utica Company at Angels is sinking a new shaft, which will be put down 2,000 feet to work the Madison. The water in the old workings has risen to within seventy-five feet of the mourh of the shaft. The owners of the Oriole have been developing it extensively and are now putting in new, machiners. The Lost Log quartz claim in Salt Spring Valley has been bouded for three years and development workis being pushed on it. The Great Western Company has bought and will develop five claims near Angels.

A six-foot ledge of low-grade galeng has been found in the old Montegums mine, near Independence, Inyo county.

found in the old Montexuma mine, near Independence, Inyo county.

The output of the Handsburk, Kern county, mines, not those of the Hand district but merely of those in the town of Randsburk, for the year now closing is estimated to have been about \$1.100,000. Late development work shows that the ore bodies are more extensive than has been supposed. From seventy tone of low grade ore the Wedge recently cleaned up \$2.200, an average of over \$30 to the ton. Twenty-live tone of ore milled over \$100 per ton.

The number of cyanide plants now being

the ion. Twenty-five tons of ore milled over \$100 per ton.

The number of cyanide plants now being built in Los Angeles shows to what an extent this process is coming into use in the Southwest. A very large percentage of gold ores throughout New Mexico, Arizona and southern California can be treated more profitably by the evanide process than by any other. The most of the plants now being built here will be installed at a cost not exceeding \$500. The McGinfy hydraulic mines in a canon tributary to the San Gabriel River have been doing well during the last summer, but owing to the searcity of water the owner has had to stop work. Some quartz claims in the same vicinity are yielding from \$25 to \$1,000 per ton. The ledge on the surface is eighteen

Employers of Labor Class Advertise in and read The Sun. To reach them you should bear in mind that no other paper affords an equal epportunity.—Adv.

inches and widens to four feet at eighty feet depth.

The Merced Company, in Mariposa county, after a shut-down of six weeks due to lack of water, has resumed work. The Mount Gaines mine is being squipped with electricity.

The Psecondido Mining Company, San Diego county, has sold its mines and plant to the Duquesne Company of Telluride, Col., for \$28,100. Assary of vein-float ore from the recently discovered sulphur mines near Coyote Wells show a gold value of \$0 per ton: Iron, 20,45 per cent, and sulphur, 30,20 per cent. The milit at the Ranchita mines is working steadily on \$30 ore, and an ore body has been opened up that will make necessary an addition of fifteen stamps. The Helvetta has been unwatered and will soon begin producing ore again. Galena has recently been discovered in FI Cajon Butte.

VIROUNIA CITY, Dec. 31.—The Hale and Norcross Mining Company has been incorporated,
the name of the old company having been
changed by dropping out the word silver. The
action was taken in order to reduce the capital
stock and save the excepts of transfer of stock.
The capital stock is \$350,000, divided into
112,000 shares at a par value of \$3. The Occidental mill is new dropping lifteen of fit
twenty stamps on ore from the mine and
crushing an average of fifty tons per day.
This represents a revenue of about \$500 per
day and if continued will soon place the pronerty on a dividend paying basis.

Near White Pine a body of one twenty feet
wide and carrying gold values has been uncovered in the Union Jack by the Butterfield
Company.

The Wester Companied and in administration against NEVADA: riferous deposits that promise to yield millions.

The has long been known to exist in various parts of Montana, but no attempt has been made to discover a ledge carrying this metal. What is known as "stream the" is found in abundance on both fores of Clancy Creek, in the placer wash and also on the tributaries, which would seem to indicate the presence of bodies of this ore at the source of these streams in the mountains. The formation here is tronite and red shale. The ore is also found in Meanher county along many of the streams having their sources in the Little Belt range. It is a fact worthy of note that wherever thoore is found lead and silver mines have been discovered.

Company.

The Eureka Consolidated is shipping a large amount of ore. At Deer Lodge Ben Johnson has a four-foot vein that gives a general average of \$50 per ton at 100 feet from the surface.

MEXICO.

MEXICO.

GUAYMAS, Dec. 31.—From the Magapil gold mines, in Durango, lately acquired by a Helgian corporation, ore has been shipped to Belgian for a test treatment. The company owns large copper properties and contemplates the erection of reduction works.

Operations have begun for extensive development of the Seven Star mining property, near Chnichupa, Chibunhua. The mine has seven well-delined veins and the ore assays high in silver. A smelter is to be erected soon. The life Conche Mining Company will seen begin to work the rich gold placer deposits at Santo Domingo. They have already put in \$237,000 in machinery and other improvements. They will work the placers by hydraulic mining and are ready to handle 5,000 tons of earth a day, which is expected to give about 40 cents gold per ton.

The production of the mines in the State of Guanaquato amounted during the year ending July 1, 1898, to \$1,074,347. Twenty years before, in 1898, the product was \$2,320,088.

SALT LAKE, Jan. 2.—During the year 1888. Utah infines made a splendid showing, both in the outout of precious metals and in dividends. The gold output amounted to 104,100 ounces, allver 7,547,722 ounces, lead \$0,346,100 pounds, and copper 5,333,658 pounds, a total of \$10,725,067,32. The dividends paid by companies making known their affairs to the general public reached the sum of \$1,000,750.

The Cannon Gold Mining Company has sold the Cannon group of claims adjoining the Mercur mine in the Mercur district. The group consists of \$5 acres, is looked upon as the best piece of undeveloped ground, in the district named, and was purchased by John Dern and E. H. Airis of the Mercur mine for \$150,008. It will be worked by the Ingot Gold Mining Company

TDAHO:

IDAHO.

IDAHO CITY, Dec. 31.—A double compartment shaft has been put down to the depth of 145 feet on the Comstock claim, in Dixte district, North, Idaho. The ore coming out is good and reduced in a ten-stamp mill. The Dillinger is also working and has over two feet of high-grade free-milling ore. Drifts from each side of the shaft at the sixty-five-foot level continue in ore.

from each side of the shaft at the sixty-fivefoot level continue in ore.

The lower tunnel in the Calwyn is in 600 feet
and a thirty-day option for \$250,000 has been
given on the property.

The Eureka, in Gambrinus district, is turning out to be a good property. A shaft was
nut down to the depth of 100 feet, from which
a drift has been run thirty feet along the vein.

The property is under bond to Fleming &
Horner, who also hold an oution on the Illinois,
on which it has been decided to expend \$10,000 in sinking.

a three-foot vein of \$40 copper and gold ore.

ALASKA.

SEATTLE, Jan. 1.—Skagway is now the scene of active cutiliting for the Attin Lake mines, parties of twenty and fifty leaving for the mines every day with light packs in hopes of making quick trips. No new strikes are reported this winter, but the late fail reports were sufficiently encouraging to keep up interest in the country. Within the past week deep snows have fallen, impeding travel, and the rivers and lakes, which are usually closed by the first of December, remain open, preventing travel over the ice.

A new listrict called Terrell, on the Upper Yukon, about 100 miles from Dawson, discovered by the officers of the steamer Terrell, is causing a big stampede from Dawson, several hundred miners having left that camp for the new diggings on the first of December. Nearly 1,000 claims have been taken up, and the rish continues. Thus far the ground is said to be paying \$1 and unward to the pan, and the creek and tributaries for a distance of 100 miles are staked.

At Dawson, while the price of labor is not so high as it was last winter, miners get from \$5 to \$10 a day of ten hours and work is plenty. The expense of living does not exceed \$2 a day. There is more actual mining going on this winter than at any time since the district was discovered. TUCSON, Dec. 29.—The Helvetia mine in the Santa Ritas, thirty miles south of Tucson, was transferred yesterday to the Calumet-Hecla Company for \$50,000. There are twelve copper claims the indeed in the property. Ore in value 40 to 50 per cent, was shipped during the eighties from the He vetta, and the body today shows ore averaging 15 per cent.

Another rich strike of gold ore has been made in the San Francisco mine, Cedar Creek. Capt. J. W. Lind, a veteran miner, is develoning some excellent claims in French Gulch, near Placeritas. He has good ore from the grass roots down, some of it going as high as \$100 per ton gold.

A shipment of forty tons of ore from the San Juan mine was made last week by Charles Qualey. The core was sent to the smeller at Deming and was accompanied by Superintendent Day. The shipment of forty tons netted \$1.147.

Mr. George R. Sutherland, has bonded the Nighthawk mine. The Nighthawk has produced thousands of dollars worth of rich ore and the workings are yet practically in the grass roots.

Mr. O. B. Hardy has gone to the Louden and

grass roots.

Mr O. B. Hardy has gone to the Louden and Mr. O. B. Hardy has gone to the Louden and Gallen mines in the Whetstone Mountains, where he is superintending the development work and attending the shipment of 1,00% sacks of high-grade conper ore that is now coming out of the mine. The ledge of ore cut by the tunnel at 180 feet has been passed, being seventeen feet thick and yielding fine neacock copper ore which averages 17 per cent, in metal the entire width.

COLORADO ner cent more, showing that improved methods resulted in the utilizing of low-grade ores. Since the first discovery of gold in the district the output has been fully \$50,000,000. Dividends amounting to \$2,588,514 were naid in 1848. There are now 334 shipping mines in the district and 6,500 men are employed, receiving wages amounting monthly to \$550,000. The population is 50,000 in Cripple Creek, Victor, Goldfield. Independence, Altman and Gillette.

Of the mines twenty-four produced last year.

ceetving wages amounting monthly to Sasa, coo. The population is 50,000 in Cripple Creek, Victor, Goldfield, Independence, Altman and Gillette.

Of the mines twenty-four produced last year a total tonnage of 313,987 tons, valued at \$12.531,531. Four mines, the Portland, the Gold Join, the Victor and the Strong, each produced over \$1,000,000. There were twaty mining companies to pay dividends.

There were seven reduction works handling Cripple Creek ores by the cyanide and chlorination processes. These treated 294,738 tons, having an average value of \$25 per ten. The smelters of the State received 117,012 tons of an average value of \$70 a ton. The stamp mills of the district handled 2,550 tons, estimated of an average value of \$9 a ton. Ore running as low as \$8 a ton was treated at a profit and some mines have contracted ore worth but \$6 a ton, the reduction mills paying freight charges and standing treatment cost in addition. Thirty new shipping mines were added to the list.

The greatest advance has been made in the introduction of electric power, and all this is already contracted for in the district. Electric holsts have proved satisfactory.

Fully \$1,000,000 was expended in machinery. The creat pumps of the Portland throw out 800 gallons per minute, the Elkton 400, and the Moon-Anchor 300.

Owing to tunnel rights difficulties progress in the construction of tunnel transportation has been slow. Two tunnels, the Standard and the New York, have made some advance, the former being 2,400 feet in length, the latter 1,700 and poth are still boring.

Of the new mines in the Cripple Creek district the Hull City placer has been the most successful. This was originally located in the first doys of the Cripple Creek discovery as a placer, and for years its possession was fought for in the courts. The gold is now found in soild rock in deep shafts. Operations have been done solely by lessees of tracts of ground on the Placer. The company has a reserve fund of over \$100,000 from its royalties, with an ore chute from two

on the placer. The company has a reserve fund of over \$100,000 from its royalties, with an ore chute from two to nine feet in width to draw from.

Bouder county made good gains last year, due mainly to the construction of the Colorado and Northwestern Raiway to Ward camp, which was followed by large shipments of low-grade ores to the new mill at Culbertson, four miles from Boulder. The total output of the county is estimated at 13,000 tons for 1897 and 10,250 tons for 1888. The gold values last year were \$170,816, silver \$108,854. There is a new chlorination plant at Eldora, one at Sugar Load and a pyritic smelter at Ward which will materially invesse the production of gold and silver in 1885. The owners of the new railway built a stamp mill at Culbertson, and forty stamps have been kept busy for six months on Boulder county ore.

Solicing county produced over \$5,000,000 in gold isst year. The only big find was made in July in the Topeka and in six months the profits have been alout \$50,000.

Leadville is recovering from its many disasters of the last six years and comes up with an estimated output of \$2,000,000 in lead and from It shipped 550,000 tons, employed \$6,000. One. The Denver and Rio Grande and the South Park railways during the year constructed feeder lines reaching the most important shippers of the district, who had for years depended upon wagons and poor roads for transportation to smelters of Leadville or to the railroads. The success of the Pens Mining Company in handling its ores through a mill—a new departure in the Leadville district—has aroused other operators to also make the experiment. Another feature of promise is the rapid introduction of the leasting system, so successful hother earns. The great problem of unwatering the great downtown miles has finally been undertaken, and the great problem of unwatering the great downtown miles has finally been undertaken, and the great problem of unwatering the produce of the leach of the state of the control of the leach of the control of the leach

the territory cleared of water so that ship- OUR NEW OPPORTUNITIES.

THE SURE MANAGERS, DANUARD S. 1899.

By TE, Jan 3.—The output and development of the raines in 1868 exceed that of any previous "ar. Butte produced approximately 300,000, "ar. Butte mining and a paid nearly \$10,000,000 in dividends. The pay rolls show that (5.945 and bare entries and encentrators, receiving \$1,512,000, Futte mining shifts were sunk \$3,512 feet deeper, or more than a mile and a half. The total leight of all operating mines in the camp is new 450,75 feet. The deepest shaft is that of the Green Mountain mine of the Anaconda Company, more than 2,100 feet in denth. Sinking still continues, with no indication of the "re playing out. More ore was produced and more shaft denth was developed than in any previous year in the history of the Butte district.

In Madison county during the past year coally experiments were made which demonstrated that below the mouth of Alder Guich, up the guich and up the Ruby Valley are auriferous deposits that promise to yield millions.

and \$3,000 silver to the lon.

In Pierre Lake district the Contention Company is pushing the maintworking tunnel 200 feet and has drifted 100 feet in the shaft at a depth of 100 feet, where it has encountered a three-foot vein of \$40 copper and gold ore.

was discovered.

The same conditions also apply to Forty-Mile district, where 2,000 miners are spend-ing the winter. The bar and beach diggings are unusually active.

BRITISH COLUMBIA

comes from Trail and Kootenai districts.

There Are 2,511 Students Enrolled -Increase

NEW HAVEN, Jan. 8.—The catalogue of Yale

University for the year 1898-10, just issued, gives the total number of students registered

as 2.511, an increase of 11 over last year. These are distributed as follows: Graduate school,

283; academic department (Yale College), 1,224; Sheffleld Scientific School, 567; art

school, 84; department of music, 76; law school, 194; medical school, 110; divinity

school, 95. The latter institution is the only department of Yale that shows a decrease.

This is in line with the history of the theological department for the past few years, which

appears to be constantly losing numerical

strength both in the number of the students

In speaking of American expansion he said: "We, in Canada, watch with much satisfac-

States. That, perhaps, is one reason why our eyes are turned upon you in your present diplomatic controversies. According to my judgment, the United States has accidentally been thrust into a situation which promises to open for her a splendid list of trade opportuni-

lous country which no other force than the holding of the port could possibly command. This trade with China is one of the most desirable which the world now offers. The tremain its respect to the respective paid in a single year up to 1888. It enters the new year with the prospect of paying double dividends nearly every month, if its managers so desire, and with lifs stores of ore still good for twenty to twenty-five years. Highland also paid a dividend of \$20,000 in the month, making \$240,000 for the year. The three properties in the Homestake group, Homestake, Highland and Deadwood Terra, have paid to date \$12,310,000, naking them the chief dividend paying concerns among the gold properties.

The total gold output of the State for the year has been \$5,841,000. More than half the year's production came from Homestake and the total increase for the year would have been much larger but for the fire in the D and D smelters last winter.

Holy Terror has read \$81,000 in dividends for the year, and no other bublic stock concern in the State, other than mentioned, has distributed its earnings. Holy Terror has twenty Keystone stamps now dropping on rich ore and has closed its one-stamp mill for repairs and improvements.

The British-American Gold Mining Company has been incorporated with a capital of \$2,000,000, has bought machinery and will improve ground near the rich Gilt Eige in Strawberry Guich. It is a Michigan concern.

ganization All Made. TEENTON, N. J., Jan. S.-The Legislature will organize on Tuesday afternoon by electing Senator Charles A. Reed of Somerset county President of the Senate and re-electing Acting Governor Davis O. Watkins of Gloucester county Speaker of the House. The committees have Speaker of the House. The committees have been prepared and will be announced in both houses on Tuesday unless some good reason prevents. Immediately after the organization has been perfected the Republicans will hold a joint caucus and nominate ex-Congressman John Kean of Elizabeth to succeed James Smith as United States Senator. It is unusual to hold the Schatorial caucus so early in the session, but as there is no opposition to Mr. Kean the leaders desire to have the matter disposed of.

Court Calendars This Day.

appears to be constantly losing numerical strength both in the number of the students and the teaching force. The most notable increase is in the graduate department, which, since it passed into the hands of the present dean. Frot. Andrew W. Phillips, has steadily increased. The number of professors, instructors and lecturers in the university for the current year is 260-an increase of five over those of last year.

The most noteworthy feature of the new entalogue is the large number of women students at present envolled in the graduate department. For the past two years the number of these women students at present envolled in the graduate department. For the past two years the competence of the women students has increased, and it is evident that in a few years the corporation will be obliged to make some adequate provision for them. At the present time according to the new catalogue, there are forty-one enrolled against the thirty-eight of 1867. 188, which was a large increase over those of the presenting to the new catalogue, there are forty-one enrolled against the flurty-eight of 1867. 188, which was a large increase over those of the presenting to the new catalogue, there are forty-one enrolled against the flurty-eight of 1867. 188, which was a large increase over those of the past of undergraduates and the faculty, with which they were received on their entrance six years ago, are things of the mast. Just what is to be done with these women students is something of a problem. It is well known that it is the ambition of Dean Philips to secure a dormitory in the near future for their accommodation. At the present time they are obliged to room everywhere and anywhere in town, which is both unpleasant and inconvenient. Florence Ewing Missing. The police were notified vesterday that Flornce Ewing, 14 years old, of 345 Pavonia avenue, Jersey City, had been missing since last Tuesday. She loft home on Tuesday morning to go to school and had not returned. She did not go to school. She is tail and slim. When she left home she wore a dark dress and blue hat.

VIEWS OF SIR JAMES EDGAR, SPEAKER

Gives an Interview in Baltimore, in Which He Says War Has Opened for This Country a Magnificent Vista of Future Trade-Our Relations with Canada BALTIMORE, Jan. 8.-The public and social dian Dominion, as well as the subject of Ameri can expansion, were discussed in an interview here to-day by Sir James Edgar, Speaker of the Canadian House of Commons. Sir James is ust recovering from a severe attack of grip

possession of a fortified stronghold in China commands a vast bulk of trade in that popu-

This trade with China is one of the most desirable which the world now offers. The tremendous sweep of territory embraced under the Chinese name, covered with a teeming multitude of people who fare destined to become large purchasers of the finished products from civilized markets, presents a most inviting field of trade into which any progressive nation might wish to enter.

"The United States may have the call in commanding that trade, but if that trade is to be effective the United States must possess a port almost at the entrance to the Chinese empire one which can and will be fortified, one from which ships of trade and ships of war can issue forth for active labors or else seek refuge in when the occasion requires it. It must be a port close to the Chinese empire, from which the United States can speak with aggressiveness. Your country must be in a position to speak in that language whose alphabet is figured in ships of war. When you can do that, then a boundless trade with the Orient will soon become for you that vertiable treasure house. The accidents of war have given to your country a commanding gateway. If utilized, and utilized to its fullest possibilities, your inture trading will become immense.

The relationship between this nation and canada is friendly and cordial. This is not a mere superficial closeness, but it is one which grews out of the real affinity of the two peoples. Aside from the fact that both are component parts of the great English-speaking world, there is a tie of kinship which springs from our neighborly situation. This intinney. I think, is destined to become more pronounced with the gradual opening of a freer reciprocal trade relationship. Our duties in some instances should be modified for us. I appreciate the fast that local elamors will be excited on both sides of the line. Local interests which consider themselves affected by the changes will protest with a lusty vigor, but the general interests of both nations should rise superior to the local interests of either.

SEATTLE, Jan. 1.—There are 500 miners doing development work in the mines of Republic district, and by spring there will be over 1,000. Republic mine has declared its regular monthly dividend of \$30,000 and Republic No. 2 announces a strike in the face of the tupnel, now in over 1,00 feet, that goes over \$54 gold a ton.

On Red Top Mountain, six miles south of the British Columbia boundary line, in what is designated the American Boundary district, in order to distinguish it from the Canadian Boundary Creek district, a rich strike has been made in the bottom of the Red Top mine shaft at a denth of fifty feet. It is only fifteen inches in width, but the assay is 10 per cent, comber and \$3,000 silver to the ton.

In Pierre Lake district the Contention Com-

NEW JERSEY LEGISLATURE. Will Meet To-Morrow with Plans of Or-

session, but as there is no opposition to Mr. Kean the leaders desire to have the matter disposed of.

The inauguration of Governor-elect Voorhees will take place on Tuesday, Jan. 17, and on the following Tuesday the two houses will ballot separately for Senator, and on the following day hold a joint meeting at which the election will be formally declared.

The organization of the Legislature will begin at 3 o'clock on Tuesday afternoon, in accordance with custom. As the terms of the Assemblymen expire on Monday night at midnight, and with them the term of Acting Governor Watkins as Speaker, there has been some gossip concerning the hiatus in the Governor-shirthat will exist between to morrow and his election to the Speakership on Tuesday afternoon. The decision by the Supreme Court in the Clifford case last week held that when Senator Voorhees resigned as Senator from Union county in October he no longer had the right to act as Governor. It would seem therefore that when Warkins's term as Assemblyman expires he will likewise be disqualified. Acting Governor Watkins has been advised by the Atorney-General to be present in the House, take the oath and occupy the Speaker's chair after his election thereto, and then call another member to fhe chair and repair to the Executive Chamber to be in readiness to receive the committee from the two houses who will announce their organization.

Mr. Watkins's message to the Legislature is

SEATTLE, Jan. 1.—In Fairview camp, Mentana capitalists have taken hold of a number of promising looking gold-copper propositions and are placing experienced Montana miners on them with a view of thorough development. The experts of the Anaconda proper have been over this country, and it is thought they are engineering this new British Columbia movement. ment.
A report comes from Rossland that a great strike has been made in the Iron Horse, the ore going \$500 to the ton. This has been a shipping property for some time past.
It is estimated that the output of the mines of British Columbia during the past rear excommittee from the two houses who will announce their organization.

Mr. Watkins's message to the Legislature is in the printer's hands. It will be brief, and it is said will deal only with the condition of the State institutions as disclosed by the annual reports. The making of recommendations as to prospective legislation and reforms will be left for Gov. Voorhees to look after in his address.

Robbed a Bowery Saloon

George Wilson of 196 Forsyth street, James McGuire of 148 Forsyth street, Frank Foley of were arraigned before Magistrate Brann in the

108 Bowery and William Foley of 112 Bowery were arraigned before alignistrate Brann in the Centre Street Court yesterday on a charge of entering the saloon at 108 Bowery on Saturday night and stealing forty-six bottles of liquor, four boxes of cigars, one revolver and an aiarm clock all worth \$60. The thieves entered the saloon through a trap door from the cellar below. They were hold in \$1,000 bail each for a further examination. Appellate Division -- Supreme Court. -- Recess until uesday, Jan. 10, at 1 P. M
